

OPPORTUNITY

NOW HIRING!

POST-DOCTORAL FELLOW

We are looking to hire an organized, detail-oriented, and motivated individual. The ideal candidate will use molecular, immunological and imaging methods to investigate the biology of arbovirus transmission at the vector-host-virus interface. Individual with demonstrated experience in viral immunology and imaging is preferred. Enthusiastic individual should also have: (1) strong interest in our lab research [<https://thangamani-lab.com/research-projects>]; (2) willingness to work with BSL-3 agents within BSL-3/ABSL-3/ACL-3 laboratories, and (4) possess strong verbal/written communication & organizational skills
