

PACIFIC SOUTHWEST CENTER OF EXCELLENCE IN
VECTOR-BORNE DISEASES

We're hiring a summer intern!

Gain hands-on biological research experience through a paid summer internship with the California Department of Public Health Vector-Borne Disease Section in Elk Grove, California. You'll work alongside Public Health Biologists and learn how to conduct field surveillance and investigations for various vector-borne diseases and you will conduct a project that will culminate in a presentation of results at a state or regional vector control or public health meeting in 2026. You'll also join a network of trainees in the Pacific Southwest region to continue building your skills and network that could lead to potential future career opportunities.
